Answer: A Explanation: <http://technet.microsoft.com/en-US/library/gg682106.aspx> QUESTION 56 You need to recommend a solution that resolves the current file server issue. The solution must meet the business requirements. What should you include in the recommendation? A. Distributed File System (DFS) B. BranchCache in distributed cache mode C. BranchCache in hosted cache mode D. A storage pool Answer: A Explanation: Scenarios for Using DFS By using from DFS-N and DFS Replication, your organization can benefit from several implementation scenarios including: Sharing files across branch offices Data collection Data distribution Sharing Files Across Branch Offices Organizations with multiple physical offices tend to share files or collaborate between offices. You can use DFS Replication to replicate files between these offices, or from branch offices to a hub site. This form of replication helps reduce wide area network (WAN) traffic, and provides high availability should a WAN link or a server fail. DFS Replication ensures that when changes are made to a file, the changes are replicated to all other sites by using delta replication. QUESTION 57 You need to create a service template for the web servers used by the CRM application. What should you include in the service template? A. A VIP template B. A host profile C. Guest OS profile D. A capability profile Answer: A Explanation:

<http://technet.microsoft.com/en-US/library/gg610569.aspx> QUESTION 58 You need to recommend a solution that meets the technical requirements for DHCP.
