2014 Latest Pass4sure&Lead2pass Citrix 1Y0-A22 Dumps (11-20)

QUESTION 11
Scenario: An administrator is migrating from XenApp 5 on windows Server 2003 to XenApp 6.5 on the Windows Server 2008 R2. All applications have been successfully moved except for one which requires Windows Server 2003. The application that requires Windows Server 2003 needs to be available to users.
Which action should the administrator take to meet the needs of the scenario?

A.   Run the CHFRAM on the XenApp 5 server.
B.   Configure the Web Interface to present applications from both farms.
C.   Stream the application that requires Windows Server 2003 to the new XenApp 6.5 Server.
D.   Use the Citrix Migration Center to migrate the published application data to XenApp 6.5.

Answer: B

QUESTION 12
Scenario: an Administrator has a single XenApp 6.5 farm with an equal number of servers in two datacenters. Datacenter 1 is used for production and datacenter 2 is used for disaster recovery failed. Users should connect to the XenApp servers in the datacenter 2 only if all servers in the datacenter 1 are offline or are running a full load.
Which two steps should the administrator take to meet the requirements? (Choose two)

A.   Create a preferential load balancing policy
B.   Create and assign a custom load evaluator at each datacenter.
C.   Create an OU, a worker group and a zone for each datacenter's servers.
D.   Create a Citrix load balancing policy with appropriate worker group preference settings.

Answer: CD

QUESTION 13
Scenario: An administrator is configuring a XenApp 6.5 farm that has the default printer settings still in place. Users at a branch office connect to the Citrix farm with an average bandwidth of 2048 kbps.
Which configuration can the administrator make to ensure that the maximum bandwidth allowed for accessing client printers does not exceeds 1024 kbps?

A.   Create a new Citrix User Policy with "Multi stream connections" enabled.
B.   Create a new Citrix User Policy with "Printer redirection bandwidth limit percent" set to 50.
C.   Create a new Citrix User policy with "Printer redirection bandwidth limit" set to 1024 kbps.
D.   Create a new Citrix User policy with "LPT port redirection bandwidth limit" set to 1024 kbps.

Answer: C

QUESTION 14
Call center users accessing a XenApp hosted desktop by means of thin client devices are unable to see a new multi-function printer in their session.
What can the administrator do to resolve this?

A.   Enable the auto-create all client printers policy.
B.   Add the new printer to the session printers policy.

C.   Install the correct printer drivers on the XenApp servers.
D.   Verify that the new printer has been added to the default printer policy.

Answer: B

QUESTION 15
Users accessing a XenApp hosted desktop by means of thin client devices can see a new network printer that has been provisioned
by the administrator using the session printers policy but are unable to print to this printer.
What can the administrator do to resolve this?

A.   Enable the auto-create all client printers policy.
B.   Add the new printer to the session printers policy.
C.   Verify that the new printer has been added to the default printer policy.
D.   Install the correct printer driver on the XenApp servers and the print server.

Answer: D

QUESTION 16
When application App 123 is configured for Session PreLaunch, what change is made to the environment?

A.   File type associations are updated
B.   Maximum concurrent instances is set to 1
C.   A new application named PreLaunch-App123 is created
D.   Maximize al startup is enabled within the published application properties.

Answer: C

QUESTION 17
Scenario: All users connect from thin clients to a XenApp hosted desktop. Recently, the Order Entry team has been printing all
documents in color. A session printers policy has been created and applied to this user group.
How can the XenApp Administrator ensure that these printers default to a setting of monochrome?

A.   Modify the Printer Properties Retention Policy.
B.   Change the universal driver preference policy to default to PCL4.
C.   Modify the existing session printing policy with the required printer settings.
D.   Adjust the Citrix Universal Printer default settings in the registry of the XenApp servers.

Answer: C

QUESTION 18
Scenario: A Citrix XenApp 6.5 environment contains several published applications. All of the published applications are installed
on every XenApp 6.5 server and a customized load evaluator is assigned to two worker groups where the servers are grouped.
The users connect from the Local Area Network (LAN) and normally they can work without problems. Users complain that
sometimes the ICA sessions are very slow.
How can the administrator determine which user session consumes the most server resources?

A.   Utilize the PowerShell SDK to monitor server processes.
B.   Run an EdgeSight report to determine which processes have the highest values.
C.   Create a new load evaluator and assign it with a new policy to the existing worker groups to determine
which processes have the highest values.

D.   Create a new Health Monitoring policy to send an alert for sessions when they reach a threshold value for processing speed to determine which processes have the highest values.

Answer: B

QUESTION 19
An administrator plans to enable session linger in a Citnx XenApp 6.5 farm.
What will be the impact on the user experience?

A.   Sessions will remain in an idle state until the user relaunches it.
B.   Sessions will be disconnected then logged off in the background.
C.   Sessions will start automatically when a user logs on to the farm
D.   Sessions will remain alive for a configurable period before termination

Answer: D

QUESTION 20
Lab Simulation
Scenario: Xirtic recently expanded and added two new branch offices: Northwest Office and Southwest office.
Information about Xirtic employees:
- Members of the sales staffroam between theTokyo office andtwo branch offices.
- Members of the Accountingstaff roam betweenthe Tokyo office and the northwestbranch office.
- These staff members travel with their corporate-issuednotebooks when roaming between offices.
- All employees in these offices print to shard, network printers.
Users Complaints:
- At the new branchoffices,users have beencomplaining about poor experience,such as long printwait times.
- The network team has indicated the WAN link betweenthe Tokyo office and branch offices is usually saturated.
The Tokyo office and the branch offices are on the following subnets:
- Tokyo: 10.73.6.0/24
- Northwest Branch office: 10.73.9.0/24
- Southwest Branch office: 10.73.12.24
The following user groups exist within the environment:
- Tokyo
- Sales
- Accounting
- Northwest
- Southwest
Each branch office has its own organization unit.
- Tokyo
- Northwest
- Southwest
The XenApp Administration needs to improve the user experience in the branch offices by limiting printing bandwidth to 20% of the total session bandwidth, which is 512 kbps.
Task: Create and configure one policy to meet the requirement as stated in the scenario. Name the policy "Policy1".

Answer: Pending
