Our online certification training offers you quick and cost-efficient way to train and become a certified professional in IT industry. Following questions and answers are all new published by Microsoft Official Exam Center: <http://www.lead2pass.com/70-339.html>

**QUESTION 61** Hotspot Questions You plan to install SharePoint Server 2016 in a new environment. You need to install the SharePoint Server prerequisite components. For each prerequisite installation method, which tool or command line utility should you use? To answer, select the appropriate tool or command line utility from each list in the answer area. Answer: QUESTION 62

**Drag and Drop Questions** Your company plans to move team sites from an on-premises SharePoint environment to the cloud. You register a custom domain with Office 365. You need to configure the Office 365 environment for the hybrid infrastructure before you configure the on-premises environment. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Answer: QUESTION 63

Your organization has a complex retention schedule that clearly defines retention policies for all document types. Each department has its own SharePoint site. In many cases, a single document library on a department site may contain financial files, human resources files, and project documentation. The following table lists the retention policies that are in place. You must administer retention rules from a single location for each type of document and must leverage out of the box functionality. You need to configure the SharePoint environment to comply with the retention schedule. What should you do? A. Configure information management policies for the document libraries. B. Activate the Disposition Approval feature. C. Activate the In-Place Records Management feature. D. Configure information management policies on content types. E. Activate library and folder-based retention. Answer: D

**QUESTION 64** A company plans to deploy a SharePoint 2016 farm. The company only has enough budget to purchase four SharePoint Server licenses and two SQL Server licenses. The farm must be highly available. You need to deploy the SharePoint 2016 farm. Which two server role sets can you use? Each correct answer presents a complete solution. A. Two front-end servers and two custom servers. B. Two front-end servers and two application servers. C. One front-end server, one application server, and two custom servers. D. One front-end server, one application server, one Search Server, and one Distributed Cache server. Answer: AB

**Explanation:** [https://technet.microsoft.com/en-us/library/mt346114\(v=office.16\).aspx](https://technet.microsoft.com/en-us/library/mt346114(v=office.16).aspx) [https://technet.microsoft.com/en-us/library/mt743704\(v=office.16\).aspx](https://technet.microsoft.com/en-us/library/mt743704(v=office.16).aspx)

**QUESTION 65** You are customizing standard content types for an organization. For the tracking of a department, you must allow users to easily select or enter a value. In some cases, users may refer to a single department by more than one name. Users must be able to select or type any name for a department but the document must be associated with only one department. You need to create a column that supports the requirements. What should you do? A. Create a Choice site column that uses check boxes. B. Create a Choice site column that uses a drop-down menu. C. Create a Managed Metadata site column. D. Create a Choice list that uses a drop-down menu. Answer: B

**Explanation:** <http://en.share-gate.com/blog/start-learn-sharepoint-advanced-column-types>

**QUESTION 66** Hotspot Questions Your development team deploys a new SharePoint Store app that interacts with the user by using an IFRAME. When the user loads a SharePoint page, the IFRAME is empty. You need to ensure that the SharePoint Store app loads properly. How should you configure authentication and authorization for the app? To answer, select the appropriate option from each list in the answer area. Answer: QUESTION 67

**Drag and Drop Questions** You manage a SharePoint environment. You need to block all ports on the SharePoint Servers that are not used for essential communications. To answer, drag the appropriate set of port ranges to the correct service. Each set of ports ranges may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Note: Each correct selection is worth one point. Answer: QUESTION 68

You deploy a SharePoint 2016 environment. You configure outgoing email settings for all SharePoint Servers. You need to enable encrypted communication between all SharePoint Servers and the enterprise SMTP server. Which two actions should you perform? Each correct answer presents part of the solution. A. Configure the SMTP server to support the TLS 1.0, TLS 1.1, or TLS 1.2 protocols. B. Install a server certificate on the SharePoint Server. C. Configure the SMTP server to support the SSL 2.0 or SSL 3.0 protocols. D. Enable STARTTLS encryption on the SharePoint Servers. E. Enable STARTTLS encryption on the enterprise SMTP server. Answer: AE

**QUESTION 69** Hotspot Questions You manage a SharePoint farm for Contoso, Ltd. You create a managed account for a User Profile service application. You need to provision User Profile service application and attach its proxy to the default group. How should you complete the Windows PowerShell commands? To answer, select the appropriate Windows PowerShell segment from each list in the answer area. Answer: Case Study 4 - Contoso, Ltd (QUESTION 70 - QUESTION 75)

**Current environment Overview** You are the SharePoint administrator for a manufacturing company named Contoso, Ltd. You have the following environments: Each site collection uses a

unique content database. DetailsDallasYou configure a My Sites host site collection at the URL <http://Dallas.contoso.com/personal>. The Dallas site collection also hosts a web application that will be used exclusively by sales department employees for creating customer sites. Employees access the site at the URL <http://customer.contoso.com>. ChicagoThe Chicago location has a primary datacenter and a secondary datacenter. DenverSome of the sites in the Denver site collection run in SharePoint 2010 mode. AtlantaThe Atlanta site collection is used exclusively by marketing department employees. DetroitThe development site collection is used only by SharePoint administrators for internal testing. SeattleThe IT site collection is used by the IT department to share content with other employees. The following servers are available in the Seattle datacenter:Server1 and Server5 are located in the Seattle perimeter network. End users have direct access only to these servers.Server2 and Server6 are optimized for high throughput.Server3 and Server7 have storage that is optimized for caching.Server4 and Server8 are not currently in use. The servers in the Seattle datacenter are not configured for redundancy. Office 365You have an existing Office 365 tenant. You use Azure Active Directory Connect to provision the hosted environment. RequirementsChicagoYou identify the following requirements for the Chicago office: General requirementsChicago must remain a standalone on-premises SharePoint environment. There must be no connectivity with Office 365.You must deploy a new Office Online Server farm named oos-chi.contoso.com to the environment. This farm will be used from within the network and externally. All connections to the Office Online Server farm must use IPSec. Disaster recovery requirementsYou must use thesecondary datacenter in Chicago for disaster recovery.You must be able to recover the Chicago.contoso.com SharePoint farm to the secondary datacenter. Any recovery operations must complete in less than five minutes if the primary datacenter fails.You must minimize the costs associated with deploying the disaster recovery solution. DallasYou identify the following requirements for the Dallas office: General requirementsYou must configure the Dallas SharePoint farm as a hybrid environment with the Office 365 tenant.You must support OneDrive for Business, Site following, Profiles, and the Extensible app launcher.You must minimize the number of servers that you must add to the environment.You must grant users only the minimum permissions needed.You must ensure that<http://dallas.contoso.com/personalsite> is only used for employee personal sites.Only farm administrators are permitted to create site collections in the <http://Dallas.contoso.com/web> applications. Requirements for sales department employeesSales users must be able to create child sites under the<http://customer.contoso.com/web> application.Sales users must be able to create site collections. SeattleYou must implement a new SharePoint environment. Employees in the IT department will use the environment to share content with other employees. You identify the following requirements for the Seattle office: General requirementsYou must configure the farm by using MinRole.You must implement redundancy.Employees must be able to search allcontent in the farm. Office 365-specific requirementsYou must support only OneDrive for Business and Profiles.You must minimize the number of servers that you must add to the environment. Other requirementsAtlantaYou must deploy a new SharePoint farm at the Atlanta office. The farm must meet the following requirements:The farm must be highly available.Operating systems must support file system encryption.Search databases must be stored on a file system that automatically repairs corrupt files.Content databases must be stored on file systems that support the highest level of scalability. BostonYou must upgrade the existing SharePoint farm to SharePoint 2016. Employees who use the farm must be able to continue using the farm during the upgrade process. DenverYou must perform a database check before you upgrade SharePoint. SQL ServerAll SharePoint environments must use dedicated SQL Servers.The Atlanta SharePoint farm must use SQL AlwaysOn and a group named SP16-SQLAO.The Atlanta SQL environment must use a SQL alias named SQL. Office 365You must use Active Directory Import to synchronize any on-premises SharePoint environments with the Office 365 tenant. QUESTION 70You need to ensure that sales department users can create sites.You grant sales department users the Full Control permission for the <http://Dallas.contoso.com/sites/Sales> site.Does the solution meet the goal? A. YesB. No Answer: BExplanation:Wrong URL. Sales users must be able to create child sites under the<http://customer.contoso.com/web> application. QUESTION 71You need to ensure that sales department users can create site collections.You run the following Windows PowerShell commands: \$w = Get-SPWebApplication <http://customer.contoso.com>\$w.SelfServiceSiteCreationEnabled = \$True\$w.Update() Does the solution meet the goal? A. YesB. No Answer: A QUESTION 72You need to ensure that sales department users can create sites.You grant sales department users permissions to create personal sites in the <http://Dallas.contoso.com/> personal site collection.Does the solution meet the goal? A. YesB. No Answer: A QUESTION 73Hotspot QuestionYou need to configure the hybrid SharePoint environments.In the table below, identify the features that you must deploy to each environment. NOTE: Make only one selection in each column. Each correct selection is worth one point. Answer: Explanation:Dallas: You must support OneDrive for Business, Site following, Profiles, and the Extensible app launcher (= Hybrid Site Features)Seattle: You must support only OneDrive for Business and Profiles (= Hybrid OneDrive for Business). QUESTION 74Drag and Drop QuestionYou need to implement the server environment for Seattle.Where should you deploy the server roles? To answer, drag the appropriate server or servers to the correct roles. Each server or set of servers may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view content. Answer: QUESTION 75 Hotspot Question You need to plan the Atlanta farm deployment. Which file systems should you use? To answer, select the appropriate file system from each list in the answer area. Answer: QUESTION 76 You are a SharePoint Administrator for Contoso, Ltd. While doing weekly maintenance you discover that a web application at <http://sharepoint.contoso.com> has an orphan site. The orphan site is located in the WSS\_Content database. You need to resolve the issue. What should you do? A. Run the following Windows PowerShell command: \$wa = Get-SPWebApplication http://sharepoint.contoso.com \$wa.Sites.SyncRootB. In Central Administration, select the <http://sharepoint.contoso.com> web application. Select the database that contains the orphaned site. Select Remove database and click OK. Run the Windows PowerShell cmdlet Dismount-SPContentDB.C. Run the following Windows PowerShell command: \$ContentDb = "WSS\_Content" \$db = Get-SPDatabase | where {\$\_.name -eq \$ContentDb} Remove-SPContentDatabase \$db Mount-SPContentDatabase -WebApplication http://sharepoint.contoso.com -Name \$ContentDbD. Run the following Windows PowerShell command: \$wa = Get-SPWebApplication http://sharepoint.contoso.com \$wa.Sites[0].Dispose(); Answer: B QUESTION 77 You are preparing to migrate content from your SharePoint Server 2016 farm to a new location. All content is hosted within a single web application across 150 site collections. You have the following requirements: - Users must be able to view existing content during the migration, but must not make changes. - You must minimize the amount of time that the migration takes. - You must return all access rights to their previous state once migration is complete. You need to configure the SharePoint site collections. What should you configure? A. an information management policy B. privacy options C. Read only access for content D. alternate access mappings E. a user policy Answer: C QUESTION 78 You are the SharePoint administrator for a company. You plan to deploy the SharePoint sites that will be accessible from the company portal. You create the following sites: A user named User1 will manage the sites. You must prevent all users except for User1 from creating sites and subsites. User1 must be able to delegate management of List permissions to other users. You designate a user in each division as a lead for that division's site. You need to allow the designated lead in a division to manage their division's site while minimizing administrative effort. What should you do? A. For each site, add the designated divisional user account to the Team owners group for that division's site. B. Add all divisional user accounts to the portal site's Team Owners group. C. Create a new SharePoint group on the Portal site named SP Division Managers. Grant the Design permission to the group and add all designated divisional lead user accounts into the group. D. Add the designated divisional user account for each divisional site and grant each user the Design permission. E. Add all the designated divisional user account to the portal site and grant each user the Design permission. Answer: D QUESTION 79 You manage a SharePoint 2016 farm. You need to import user profiles and photos from Active Directory to the SharePoint 2016 farm. Which tool or service should you use? A. User Profile service application B. Active Directory Import C. Microsoft Identity Manager D. Microsoft Forefront Identity Manager Answer: A Explanation: <https://technet.microsoft.com/en-us/library/jj219646.aspx> QUESTION 80 You have an existing SharePoint 2016 on-premises environment. You use document libraries as file archives. Users report that they cannot upload documents larger than 3 gigabytes (GB). You need to ensure that users can upload any type of file up to 4 GB in size. What should you do? A. On each front-end server in the farm, locate the following registry key: HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet\Services\WebClient\Parameters Set the value of the FileSizeLimitInBytes key to 4294967295. Then, restart the Web Client service. B. In SharePoint Central Administration, change the value of the Maximum Upload Size property for the web application. C. Run the following Windows PowerShell command: \$WebApp.MaximumFileSizePerExtension.Add("MaxFileSize", 4096000) D. Add the following markup to the web.config file for the web application: <httpRuntime executionTimeout="999999" maxRequestLength="4096000" requestValidationMode="2.0" /> Answer: B The strength of our 70-339 dumps is the constant update that we perform to keep abreast with the market trends and changes. Our 70-339 exam question is not only the best option for certification but also enhances your skill to an advance level. 70-339 new questions on Google Drive: <https://drive.google.com/open?id=0B3Syig5i8gpDLU14ZUEtYkdPeUk> 2017 Microsoft 70-339 exam dumps (All 98 Q&As) from Lead2pass: <http://www.lead2pass.com/70-339.html> [100% Exam Pass Guaranteed]
