

[2017 New Lead2pass Microsoft 70-345 VCE And PDF Instant Download (11-20)]

2017 April Microsoft Official New Released **70-345** Q&As in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed! Lead2pass dumps for 70-345 exam are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development. We guarantee the best quality and accuracy of our products. We hope you pass the exams successfully with our practice test. With our Microsoft 70-345 dumps, you will pass your exam easily at the first attempt. You can also enjoy 365 days free update for your product. Following questions and answers are all new published by Microsoft Official Exam Center: <http://www.lead2pass.com/70-345.html>

QUESTION 11 After deploying new servers, you configure the development applications to send email notifications by using a new server that runs Exchange Server 2016. You need to reduce the likelihood that the email messages will be identified incorrectly as spam. What should you do?

A. On the new server run, theSet-TransportConfigmdlet and specify the-/nterna/SMTPServersparameter.

B. Create a new internal relay accepted domain.

C. Upgrade EdgeEX to Exchange Server 2016.

D. On the new server run, run theSet-TransportServercmdlet and specify Xhe-AntiSpamAgentsEnabledar6et

Answer: A Explanation: <http://www.techieshelp.com/exchange-2013-enable-anti-spam/>

QUESTION 12 You need to ensure that members of a group named Relecloudadmins can create user accounts and mailboxes for new employees after the planned upgrade. What should you do first?

A. Run theNew-ManagementRolecmdlet.

B. Run theNew-ManagementRoleAssignmentcmce.

C. Run setup.exe and specify the/PrepareDoma/nparameter.

D. Run setup.exe and specify the/prepareADparameter.

Answer: B Explanation: [https://technet.microsoft.com/en-us/library/dd335193\(v=exchg.160\).aspx](https://technet.microsoft.com/en-us/library/dd335193(v=exchg.160).aspx)

Case Study 3 - Contoso Ltd (Question 13 - Question 18)

Overview General Overview Contoso. Ltd. is an international company that has 3,000 employees. The company has sales, marketing, research, and human resource departments. Physical Locations Contoso has two main offices. The offices are located in New York and Chicago. Each office has a data center. The New York office uses a network subnet of 10.1.0.0/16. The Chicago office uses a network subnet of 10.128.0.0/16. The offices connect to each other by using a WAN link. Each office connects directly to the Internet. Existing Environment Active Directory The network contains an Active Directory forest named contoso.com. The forest contains a single domain. All domain controllers run Windows Server 2012 R2. The forest functional level is Windows Server 2012 R2. The forest contains six domain controllers configured as shown in the following table. The forest is configured as a single Active Directory site. Active Directory administrators manage the Active Directory schema. Exchange Server administrators do not have access to modify the schema. Contoso has deployed Active Directory Rights Management Services (AD RMS). Current Business Model Contoso partners with a company names Fabrikam. Inc. on manufacturing initiatives. The partnership between Contoso and Fabrikam requires that both companies share confidential information frequently. Requirements Business Goals Contoso plans to install Exchange Server 2016 to provide messaging services for its users. It must be as easy as possible for the users at Contoso to share free/busy information with the users at Fabrikam. As much as possible. Contoso plans to minimize the costs associated with purchasing hardware and software. Planned Changes Contoso plans to implement the following changes before installing Exchange Server 2016:

- Install hardware Network Load Balancing (NLB) in the New York and Chicago offices.
- Implement Microsoft Office Online Servers in the New York and Chicago offices.
- Provide Contoso users with company-approved tablets.

Planned Messaging Infrastructure You plan to create an Exchange Server 2016 organization named Contoso. You plan to deploy seven servers that will have Exchange Server 2016 installed. The servers will be configured as shown in the following table. All of the servers will be members of a database availability group (DAG) named DAG01.

Client Access Requirements Contoso identifies the following client access requirements for the planned deployment:

- Users must be able to configure their tablet to synchronize email by using Autodiscover.
- Users must be able to access the Exchange Server organization by using the following names:
 - o Mail.contoso.com
 - o Autodiscover.contoso.com
- Users must be able to access Outlook on the web internally and externally from their tablet.
- Users must be able to access Office Online Server by using the URL of office-online.contoso.com.

Security Requirements Contoso identifies the following security requirements for the planned deployment:

- Exchange Server mailbox databases must be encrypted while at rest.
- Users must be prevented from using Outlook on the web while they are offline.
- Contoso users must be able to share Calendar details with approved external domains only.
- Email messages sent to the users in the fabrikam.com SMTP domain must be encrypted automatically.
- Whenever possible, client computers must be directed to the same Exchange server for log collection.
- Users must be able to access their mailbox by using Exchange ActiveSync on the company-approved tablets only.
- Email messages sent from the users in the human resources department of Contoso must be protected by using AD RMS, regardless of the mail client.

Availability Requirements Contoso identifies the following high-availability requirements for the planned deployment:

- Servers must be able to complete a restart without administrative intervention.
- The network load balancer must be able to probe the health of each workload.
- If a data center fails, the databases in the other data center must be activated automatically.
- Redundant copies of all email messages must exist in

the transport pipeline before and after delivery. - Email messages must be made highly available by the Exchange Server organization before and after delivery. - If you manually mount the databases following the data center failure, the databases in the failed site must be prevented from mounting automatically. QUESTION 13 You need to recommend a solution that meets the security requirements for the mailbox databases. What should you include in the recommendation? A. Resilient File System (ReFS) B. Transparent Data Encryption (TDE) C. BitLocker Drive Encryption (BitLocker) D. Encrypting File System (EFS) Answer: C QUESTION 14 You run the Get-SendConnector cmdlet and you receive the following output. You need to recommend which actions are required to secure email connectivity between the contoso.com SMTP domain and the fabrikam.com SMTP domain. Which two actions should you recommend? Each correct answer presents part of the solution. A. Import a server certificate that has a subject name of ex01.contoso.com and a subject alternate name of ex02.contoso.com. B. Create an Outlook protection rule. C. Import a server certificate that has a subject name of smtp.contoso.com. D. Configure the TLSSendDomainSecureListparameter for the organization. E. Modify the ConnectTypeparameter for the Send connector. Answer: CD Explanation: [https://technet.microsoft.com/en-gb/library/bb123543\(v=exchg.141\).aspx](https://technet.microsoft.com/en-gb/library/bb123543(v=exchg.141).aspx) QUESTION 15 You need to recommend a solution that meets the security requirements for mobile devices. Which two objects should you include in the recommendation? Each correct answer presents part of the solution. A. a device access rule B. a mobile device mailbox policy C. a data loss prevention (DLP) policy D. an Outlook Web App policy Answer: AD Explanation: <https://technet.microsoft.com/en-us/library/dn792010.aspx> [https://technet.microsoft.com/en-us/library/dd297989\(v=exchg.160\).aspx](https://technet.microsoft.com/en-us/library/dd297989(v=exchg.160).aspx) QUESTION 16 Hotspot Question You need to instruct the Active Directory administrators how to prepare the Active Directory environment to support the planned Exchange Server 2016 deployment. What command should you instruct administrators to run? To answer, select the appropriate options in the answer area. Answer: QUESTION 17 Drag and Drop Question You need to configure the Exchange Server organization to support the security requirements for Calendar sharing. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Answer: QUESTION 18 You need to recommend a solution that meets the security requirements for the tablets. Which two objects should you include in the recommendation? Each correct answer presents part of the solution. A. a mobile device mailbox policy B. an Outlook Web App policy C. a data loss prevention (DLP) policy D. a device access rule Answer: BD Explanation: Scenario: Users must be able to access Outlook on the web internally and externally from their tablet. Users must be able to configure their tablet to synchronize email by using Autodiscover. Users must be able to access their mailbox by using Exchange ActiveSync on the company-approved tablets only QUESTION 19 Hotspot Question You have an Exchange Server organization. The organization contains four servers. The servers configured as shown in the following table. You plan to upgrade the organization to Exchange Server 2016. You need to identify which servers have functionalities that can be fully achieved by using Exchange Server 2016. What should you identify? To answer, select the appropriate options in the answer area. Answer: QUESTION 20 Drag and Drop Question You have an Exchange Server 2016 organization. The organization contains 2,000 mailboxes. You need to provide administrators with the ability to perform the following tasks: - An administrator named Admin1 must be able to create custom message classifications. - An administrator named Admin2 must be able to create retention tags. Which management role group should you assign to each administrator? To answer, drag the appropriate role groups to the correct administrators. Each role group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: We offer standard exam questions of Microsoft 70-345 dumps. The standard exams are important if you have never taken a real exam. The accuracy of the Q&As are fully guaranteed and the number is enough to impact you passing the exam. 70-345 new questions on Google Drive: <https://drive.google.com/open?id=0B3Syig5i8gpDeXNER2I1REtHTIU> 2017 Microsoft 70-345 exam dumps (All 93 Q&As) from Lead2pass: <http://www.lead2pass.com/70-345.html> [100% Exam Pass Guaranteed]
