[2018-1-19 2018 Microsoft 70-535 Dumps Free Download 100% Pass Promised By Lead2pass

100% New Updated 70-535 New Questions Lead2pass Helps Pass 70-535 Exam Successfully.v.2018-1-19.284q

https://www.lead2pass.com/70-535.html QUESTION 244Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. A company has custom ASP.net and Java applications that run on old versions of Windows and Linux. The company plans to place applications in containers. You need to design a solution that includes networking, service discovery, and load balancing for the applications. The solution must support storage orchestration. Solution: You create an Azure virtual network, a public IP address, and load balancer. Then add virtual machines (VMs) to the solution and deploy individual containers on them. Does the solution meet the goal? A.   YesB.   NoAnswer: B QUESTION 245Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. A company has custom ASP.net and Java applications that run on old versions of Windows and Linux. The company plans to place applications in containers. You need to design a solution that includes networking, service discovery, and load balancing for the applications. The solution must support storage orchestration. Solution: You deploy each application to an Azure Web App that has container support. Does the solution meet the goal? A.   YesB.   No Answer: B QUESTION 246Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. A company has custom ASP.net and Java applications that run on old versions of Windows and Linux. The company plans to place applications in containers. You need to design a solution that includes networking, service discovery, and load balancing for the applications. The solution must support storage orchestration. Solution: Deploy a Kubernetes cluster that has the desired number of instances of the applications. Does the solution meet the goal? A.   YesB.   No Answer: AExplanation:

https://docs.microsoft.com/en-us/azure/container-service/kubernetes/container-service-intro-kubernetes QUESTION 247Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are designing a storage solution to support on-premises resources and Azure-hosted resources. You need to provide on-premises storage that has built-in replication to Azure. Solution: You include Azure Table storage in the design. Does this solution meet the goal? A.   YesB.   No Answer: B QUESTION 248Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are designing a storage solution to support on-premises resources and Azure-hosted resources. You need to provide on-premises storage that has built-in replication to Azure. Solution: You include Azure Blob storage in the design. Does this solution meet the goal? A.   YesB.   No Answer: B QUESTION 249Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are designing a storage solution to support on-premises resources and Azure-hosted resources. You need to provide on-premises storage that has built-in replication to Azure. Solution: You include Azure StorSimple storage in the design. Does this solution meet the goal? A.   YesB.   No Answer: AExplanation:

https://docs.microsoft.com/en-us/azure/storsimple/storsimple-overview QUESTION 250You are designing an Azure Web App that includes many static content files. The application is accessed from locations all over the world by using a custom domain name. You need to recommend an approach for providing access to the static content with the least amount of latency. Which two actions should you recommend? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point. A.   Place the static content in Azure Blob storage and enable Content Delivery Network (CDN) on the account.B.   Place the static

content in Azure Table storage.C.   Configure a custom domain name that is an alias for the Azure Storage domain.D.   Configure a CNAME DNS record for the Azure Content Delivery Network (CDN) domain. Answer: CDExplanation: https://docs.microsoft.com/en-us/azure/architecture/best-practices/cdn QUESTION 251You are designing a microservices architecture that will support a web application.The solution must meet the following requirements: - Allow independent upgrades to each microservice.- Deploy the solution on-premises and to Azure.- Set policies for performing automatic repairs to the microservices.- Support low-latency and hyper-scale operations. You need to recommend a technology. What should you recommend? A.   Azure Container InstanceB.   Azure Container ServiceC.   Azure Virtual Machine Scale SetD.   Azure Service Fabric Answer: DExplanation:https://msdn.microsoft.com/en-us/magazine/mt595752.aspx QUESTION 252You have a customer database on your internal network. The database supports an application that your sales organization uses. You plan to migrate the application to the cloud. All customer data must remain inside the corporate network. You need to ensure that the application can access the customer data without affecting network security. What should you do? A.   Open the ports required to access the database in the network firewall.B.   Use Microsoft Azure Service Bus Relay to expose and consume a SOAP web service with TCP.C.   Configure Direct Access on the virtual network.D.   Create a Site-to-Site VPN connection. Answer: CExplanation: https://docs.microsoft.com/en-us/windows-server/remote/remote-access/directaccess/directaccess QUESTION 253You are designing an Azure Media Services solution. The solution must meet the following requirements: - Allow only authenticated users to play back media.- Ensure that media playback uses dynamic and envelope encryption. Which three actions should you recommend? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point. A.   Configure the media encoder to use AES clear key encryption.B.   Encode source files into single-bitrate MP4 files.C.   Configure a content key authorization policy.D.   Configure the media encoder to use DRM encryption.E.   Configure an asset delivery policy.F.   Encode source files into adaptive-bitrate MP4 files.G.   Encrypt the files using AES 256 bit encryption and upload to Azure Storage. Answer: CEFExplanation: https://github.com/MicrosoftDocs/azure-docs/blob/master/articles/media-services/media-services-protect-with-aes128.md QUESTION 254A company uses Microsoft Operations Management Suite (OMS) to manage 1,000 virtual machines (VMs) in Azure. The security officer reports that VMs often are not updated. You recommend to the company that they implement the OMS Update Management solution. You need to describe the OMS Update Management solution to the company. Which functionality does the OMS Update Management solution provide? A.   assessment of missing Windows and Linux updates on the VMsB.   assessment of antimalware on the VMsC.   assessment of Windows and Linux upgrades on the VMsD.   alerts regarding VM issues Answer: AExplanation:https://docs.microsoft.com/en-us/azure/operations-management-suite/oms-solution-update-management QUESTION 255A company has a public-facing website that is being monitored using Microsoft Operations Management Suite (OMS). The OMS service map solution is deployed. Customers report that the website displays error messages and is very slow to load pages each day at 04:00. The company plans to use the OMS Service Map solution to investigate the issues. You need to recommend actions that the company should perform with OMS Service Map. Which three actions should you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point. A.   View alerts that show critical CPU utilization.B.   Install updates to the device that hosts the website.C.   Create a backup of the web server.D.   View the device that hosts the website.E.   View the process that produced the alert. Answer: ADEExplanation: https://docs.microsoft.com/en-us/azure/operations-management-suite/operations-management-suite-service-map QUESTION 256You have business services that run on an on-premises mainframe server. You must provide an intermediary configuration to support existing business services and Azure. The business services cannot be rewritten. The business services are not exposed externally. You need to recommend an approach for accessing the business services. What should you recommend? A.   Connect to the on-premises server by using a custom service in Azure.B.   Expose the business services externally.C.   Expose the business services to the Azure Service Bus by using a custom service that uses relay binding.D.   Move all business service functionality to Azure. Answer: BExplanation:http://azure.microsoft.com/en-gb/documentation/articles/service-bus-dotnet-how-to-use-relay/ QUESTION 257You are designing an Azure solution. The network traffic for the solution must be securely distributed by providing the following features: - HTTPS protocol- Round robin routing- SSL offloading You need to recommend a load balancing option.What should you recommend? A.   Azure Internet Load Balancer (ILB)B.   Azure Load BalancerC.   Azure Traffic ManagerD.   Azure Application Gateway Answer: DExplanation: https://docs.microsoft.com/en-us/azure/application-gateway/application-gateway-introduction QUESTION 258You use a virtual network to extend an on-premises IT environment into the cloud. The virtual network has two virtual machines (VMs) that store sensitive data. The data must only be available using internal communication channels. Internet access to those VMs is not permitted. You need to ensure that the VMs cannot access Internet. Which two options should you recommend? Each correct answer

presents a complete solution. NOTE: Each correct selection is worth one point. A. Azure ExpressRouteB. network interface (NIC)C. Source Network Address Translation (SNAT)D. Network Security Groups (NSG) Answer: ADExplanation:

https://docs.microsoft.com/en-us/azure/expressroute/expressroute-introduction

https://reticent.net.nz/prevent-internet-access-from-azure-virtual-machines/ QUESTION 259A company hosts a website and exposes web services on the company intranet.The intranet is secured by using a firewall. Company policies prohibit changes to firewall rules. Devices outside the firewall must be able to access the web services. You need to recommend an approach to enable inbound communication. What should you recommend? A. the Azure Access Control ServiceB. Windows Azure PackC. the Azure WCF RelayD. a web service in an Azure role that relays data to the internal web services Answer: CExplanation:

https://docs.microsoft.com/en-us/azure/service-bus-relay/relay-what-is-it QUESTION 260A partner manages on-premises and Azure environments. The partner deploys an on-premises solution that needs to use Azure services. The partner deploys a virtual appliance. All network traffic that is directed to a specific subnet must flow through the virtual appliance. You need to recommend solutions to manage network traffic. Which two options should you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point. A. Configure Azure Traffic Manager.B. Configure a routing table with forced tunneling.C. Implement an Azure virtual network.D. Implement Azure ExpressRoute. Answer: ADExplanation:

https://docs.microsoft.com/en-us/azure/traffic-manager/traffic-manager-overview

https://docs.microsoft.com/en-us/azure/expressroute/expressroute-routing QUESTION 261You manage on-premises network and Azure virtual networks. You need a secure private connection between the on-premises networks and the Azure virtual networks. The connection must offer a redundant pair of cross connections to provide high availability. What should you recommend? A. virtual network peeringB. Azure Load BalancerC. VPN GatewayD. ExpressRoute Answer: BExplanation:

https://docs.microsoft.com/en-us/azure/load-balancer/load-balancer-overview QUESTION 262You are designing a solution that will aggregate and analyze data from Internet of Things (IoT) devices. The solution must meet the following requirements: - Store petabytes of data- Use shared access policies to provide service connections to the IoT event source.- Conduct analysis of data in near real-time.- Provide ultra-low latency and highly scalable transaction processing. You need to recommend a technology. What should you recommend? A. Azure Data Lake StoreB. Azure Redis CacheC. Azure Time Series InsightsD. Azure Table storage Answer: AExplanation:https://azure.microsoft.com/en-us/services/data-lake-store/ QUESTION 263Your company uses Office 365 for all employees. The company plans to create a website where customers can view and register technical support cases. The solution must meet the following requirements: - Provision customer identities by using social media accounts.- Users must be able to access the website by using social media accounts including Facebook.- Employees of the customer service department must be able to access the site to read the cases and resolve them. You need to design an identity solution for the company. Which two actions should you recommend? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point. A. a custom policy to link internal store to the external storeB. a new Azure Active Directory (Azure AD) business-to-business (B2B) tenantC. an Azure SQL data sync to link the internal store to the external oneD. a new Azure Active Directory (Azure AD) business-to-consumer (B2C) tenantE. a new Azure Active Directory (Azure AD) tenant Answer: ADExplanation:

https://docs.microsoft.com/en-us/azure/active-directory-b2c/active-directory-b2c-overview

https://docs.microsoft.com/en-us/azure/active-directory-b2c/active-directory-b2c-overview-custom **70-535 dumps full version (PDF&VCE):** https://www.lead2pass.com/70-535.html **Large amount of free 70-535** exam questions on Google Drive: https://drive.google.com/open?id=1Gd3yWBpMHm1aMLDdjKNR4ZcW_R5f1LSl You may also need: 70-532 exam dumps: https://drive.google.com/open?id=0B3Syig5i8gpDbm1XNUxwQUYwaWM 70-533 exam dumps: https://drive.google.com/open?id=0B3Syig5i8gpDclh4YVRORS1vaHc
