In each domain, all of the client computer accounts reside in an organizational unit (OU) named AllComputers and all of the user accounts reside in an OU named AllUsers. All domain controllers run Windows Server 2008 R2 and are configured as DNS servers. The functional level of the domain and the forest is Windows Server 2008. Network InfrastructureThe main office has the following servers: - Five physical Hyper-V hosts that run Windows Server 2012 - Three virtual file servers that run Windows Server 2008 R2 - One physical DHCP server that runs Windows Server 2008 R2 - Ten physical application servers that run Windows Server 2012 - One virtual IP Address Management (IPAM) server that runs Windows Server 2012 - One virtual Windows Server Update Services (WSUS) server that runs Windows Server 2008 R2 - One physical domain controller and two virtual domain controllers that run Windows Server 2008 R2 Each branch office has following servers: - One virtual file server that runs Windows Server 2008 R2 - Two physical Hyper-V hosts that run Windows Server 2012 - One physical DHCP server that runs Windows Server 2008 R2 - One physical domain controller and two virtual domain controllers that run Windows Server 2008 R2 All of the offices have a high-speed connection to the Internet. The offices connect to each other by using T1 leased lines.The IPAM server in the main office gathers data from the DNS servers and the DHCP servers in all of the offices.
