

[Lead2pass New 100% New Updated 200-310 New Questions Lead2pass Helps Pass 200-310 Exam Successfully (301-320)]

2017 October Cisco Official New Released 200-310 Dumps in Lead2pass.com!] 100% Free Download! 100% Pass Guaranteed!

We never believe in second chances and Lead2pass brings you the best 200-310 Exam Questions which will make you pass in the first attempt. We guarantee all questions and answers in our 200-310 Dumps are the latest released, we check all exam dumps questions from time to time according to Cisco Official Center, in order to guarantee you can read the latest questions! Following questions and answers are all new published by Cisco Official Exam Center: <https://www.lead2pass.com/200-310.html> QUESTION 301 Which level needed to be set on Cisco WLC for VoIP traffic? A. PLATINUM B. GOLD C. SILVER D. BRONZE Answer: A QUESTION 302 Choose considerations for access layer design? (Choose two.) A. QoS B. Routing C. Port security D. Load balance E. HSRP Answer: AC QUESTION 303 For a VLAN that requires 60 hosts, which subnet is the most efficient? A. 10.0.0.1/20 B. 172.31.17.0/27 C. 10.10.10.0/26 D. 192.168.15.0/24 Answer: C QUESTION 304 Which option is an advantage of a Layer 3 access model over the traditional Layer 2 access model? A. Increased neighbor adjacencies B. Faster convergence C. Reduced resources on the router D. Reduced size of routing table Answer: B QUESTION 305 Which data center connection supports QoS, full mesh deployment and typically offers SLAs? A. Internet VPN B. MPLS C. DMVPN D. Frame Relay Answer: B QUESTION 306 In Cisco ACI, which option is the unified point of automation, management, monitoring and programmable? A. Python B. REST C. APIC D. Postman Answer: C QUESTION 307 An engineer is designing a solution for multiple multihomed to establish router between one another which design must be? A. OSPF B. iBGP C. eBGP D. EIGRP Answer: C QUESTION 308 Which statement about modular network design is true? A. It is complex and should be used only in specialized situations B. Each deployed module is identical to the others, simplifying configuration C. It is flexible architecture that simplify design, management and troubleshooting D. Each module include access, distribution and core layers. Answer: C QUESTION 309 Which option is an object instance than an API identifies using information model-based architecture? A. DN B. Class C. Method D. MO Answer: A QUESTION 310 A Consulting engineer is tasked with designing a company LAN Network Infrastructure. Two requirements are the ability for fast convergence summarization anywhere in the network, independent of router location or role. Which routing protocol support this effort? A. OSPF B. RIP C. BGP D. EIGRP Answer: D QUESTION 311 Traditionally, the DMZ exists between which two locations? (Choose two.) A. Metro Access B. Corporate Network C. Building access D. Building distribution E. Internet Answer: BE QUESTION 312 What branch connection type supports SLAs, Full-Mesh connectivity and QoS? A. Frame Relay B. MPLS C. Internet VPN D. Point-to-Point Answer: B QUESTION 313 Which statement about using STP in a redundant-link scenario is true? A. It provides the most efficient use of redundant links B. It bonds the two links and treats them as one link C. It uses only one redundant link at any one time D. It balances traffic by transmitting packets on alternating links Answer: C QUESTION 314 Company ABC has intermittent problems registering remote-site IP phones over the WAN with Cisco Unified CallManager at headquarters. The Company hires a network consultant to help implement QoS in its network. Which technique should the consultant use to identify traffic and applications that traverse the network? A. NBAR B. RSVP C. Policing D. Priority queuing Answer: A QUESTION 315 Which statement about VSS is true? A. It requires HSRP B. It requires STP for link redundancy C. It can maintain the topology independently of STP D. It has two control planes Answer: C QUESTION 316 Which two methods are used to reduce the mesh links required between iBGP peers in the same AS? (Choose two.) A. Community B. Route reflectors C. Local preference D. Confederations E. Atomic aggregate Answer: BD QUESTION 317 Which address is the broadcast address of subnet 120.20.78.8/30? A. 120.20.78.8 B. 120.20.78.12 C. 120.20.78.1 D. 120.20.78.11 Answer: D QUESTION 318 Which connection provides cost effective backup connectivity for a branch network? A. Frame Relay B. MPLS C. ATM D. Internet VPN Answer: D QUESTION 319 A network engineer is implementing a new mesh WAN topology. The solution support synchronous bandwidth and allow for future growth? Which solution is best suited to meet these requirements? A. DMVPN over business class modem B. SSL VPN over business class cable modem C. Bonded T1s D. MPLS over Ethernet Answer: A QUESTION 320 Refer to the exhibit. Which functionality must be enabled on router A to connect two network for translating private address into "Legal" public addresses on a one-for-one basis? A. PPP B. VLAN C. NAT D. PAT Answer: C Lead2pass new released 200-310 PDF are now for free download, download it right now and pass your exam 100%. **200-310** new questions on Google Drive: <https://drive.google.com/open?id=0B3Syig5i8gpDUE9zeHd2YUFFNUE> **2017 Cisco 200-310** exam dumps (All 544 Q&As) from Lead2pass: <https://www.lead2pass.com/200-310.html> [100% Exam Pass Guaranteed]
