A.   Advanced Configuration SettingsB.   General System SettingsC.   SecurityD.   Networking Answer: CExplanation:In the Web Client interface, you'll find the firewall configuration under the Security and Services folder of a host profile. QUESTION 3It is determined that the Migration Assistant will be used to migrate from vCenter Server 5.5 on Windows with an external instance of Update Manager to a vCenter Server Appliance 6.5.Which option is correct in regard to migrating Update Manager? A.   The Migration Assistant must be run on vCenter Server first and then on the Update Manager server.B.   The Migration Assistant must be run on the Update Manager server first and then on vCenter Server.C.   Migrating Update Manager from legacy versions of vCenter Server to a vCenter Server Appliance 6.5 is not supported.D.   The Migration Assistant can only migrate local instances of Update Manager to the vCenter Server Appliance 6.5. Answer: BExplanation:Before running a migration from vCenter Server that runs on Windows, or upgrading vCenter Server Appliance that use an external Update Manager, you must download and run the VMware Migration Assistant on the source Windows physical server or the Windows virtual machine where Update Manager runs. The VMware Migration Assistant facilitates the migration of the Update Manager server and database to the vCenter Server Appliance 6.5.
