New Released Juniper JN0-696 Exam Questions From Juniper Exam Center (41-46)

2016 July Juniper Official New Released JN0-696 Q&As in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed! There are many companies that provide JN0-696 braindumps but those are not accurate and latest ones. Preparation with Lead2pass JN0-696 practice test study guide is a best way to pass this certification exam in easy way. Following questions and answers are all new published by Juniper Official Exam Center: http://www.lead2pass.com/jn0-696.html QUESTION 41 Click the Exhibit button. You are implementing a high availability chassis cluster on an SRX Series device. You would like to manage both devices through the J-Web utility. However, when you try to log in to the second device using SSL HTTP, you receive a message from your Web browser indicating that the message has timed out.

```
{primary:node0}
user@srx> show chassis cluster interfaces
Control link 0 name: fxp1
Control link status: Up

Fabric interfaces:
    Name       Child-interface      Status
    fab0       ge-0/0/2             up
    fab0
    fab1       ge-9/0/2             up
    fab1
Fabric link status: Up

Redundant-ethernet Information:
    Name       Status              Redundancy-group
    reth0      Down                1
    reth1      Down                1
    reth2      Down                Not configured
    reth3      Down                Not configured

Interface Monitoring:
    Interface      Weight      Status      Redundancy-group
    ge-0/0/1       255         Down        1
    ge-9/0/1       255         Up          1
    ge-9/0/0       255         Down        1
    ge-0/0/0       255         Down        1

{primary:node0} user@srx> show chassis cluster status

Cluster ID: 3
    Node name Priority  Status     Preempt    Manual failover
Redundancy-group: 0, Failover count: 1
    node0     254        primary    no         no
    node1     2          secondary  no         no
Redundancy-group: 1, Failover count: 1
    node0     254        primary    no         no
    node1                secondary  no
```

Why you are receiving this message? A. There is a firewall policy blocking traffic to the control plane. B. HTTP is not configured as host inbound traffic. C. The incoming traffic is not being allowed on the correct port. D. The rdp daemon is on standby on the secondary device. Answer: A QUESTION 42 A customer downloaded and installed the IDP policy template. After copying the recommended templates and creating the needed policy, the customer deleted the templates. After the commit, the templates return. Which command will prevent the templates from appearing again? A. user@srx# deactivate security idp active-policy Recommended B. user@srx# delete security idp idp-policy Recommended C. user@srx# set security idp security-package automatic D. user@srx# deactivate system scripts commit file templates.xsl Answer: D Explanation: Delete or deactivate the commit script file. By deleting the commit script file, you avoid the risk of overwriting modifications to the template when you commit the configuration. Run one of the following commands: user@host# delete system scripts commit file

templates.xsl user@host# deactivate system scripts commit file templates.xsl
http://www.juniper.net/documentation/en_US/junos12.1x47/topics/task/configuration/idp-predefined-policytemplate-downloading-and-using-cli.html QUESTION 43 You have an SRX branch device with two ISP connections. During analysis of the traffic, you notice that traffic from internal users to ISP 1 are replied to by ISP 2. Which two configurations will correct the asymmetric problem? (Choose two.) A.   Create a security policy to allow traffic through ISP 1 only. B.   Create routing instances that include routes to ISP 1 and ISP 2. C.   Configure filter-based forwarding to provide load balancing. D.   Create an interface-specific firewall filter to forward the traffic to ISP 1. Answer: AB QUESTION 44 You are asked to update the IDP signature database. After you issue the request security IDP security-package download command, you need to monitor the process. Which command would you use to accomplish this task? A.   request security idp security-package download status B.   request security idp security-package download full-update C.   request security idp security-package install D.   request security idp security-package install status Answer: A Explanation: Use the following command: root# run request security idp security-package download status https://kb.juniper.net/InfoCenter/index?page=content&id=KB28004&actp=search QUESTION 45 You are requested to verify that the UTM service is running on the SRX Series device. Which command will accomplish this task? A.   show security utm status B.   run show security utm web-filtering statistics C.   run show security utm status D.   show security utm session Answer: A Explanation: To verify the UTM service status, from operational mode, enter the show security utm status command. http://www.juniper.net/documentation/en_US/junos12.1x47/topics/example/security-utm-enhanced-webfiltering-site-reputation-action-configuring.html QUESTION 46 Click the Exhibit button. You are reviewing the status of a high-end SRX Series chassis cluster and notice that some interfaces have error messages.

```
{primary:node0}
user@srx> show chassis cluster interfaces
Control link 0 name: fxp1
Control link status: Down
. . .

{primary:node0}
user@srx> show chassis cluster interfaces
Control link 0 name: em0
Control link 1 name: em1
Control link status: Down
```

   Referring to the exhibit, which two steps would you use to troubleshoot the problem? (Choose two.) A.   Verify the security policies for incoming traffic. B.   Verify if there are Layer 1 or Layer 2 issues between the node devices. C.   Recognize the control link port to a different Services Processing Card (SPC), move the cable, and rebootboth nodes. D.   Reconfigure the firewall filters to allow traffic. Answer: BC Explanation: B: If the Control Link is SFP-type port, change the transceiver on both ends. Ensure that the transceivers are same type (LX, SX, etc.) and that they are Juniper-branded parts. C: Change the cable that you are using for control link. Is the interface link light GREEN now? Yes - Previous link cable was faulty. Recommend to now reboot both the nodes simultaneously. http://kb.juniper.net/InfoCenter/index?page=content&id=kb20698&actp=search We give you the proper and complete training with free JN0-696 Lead2pass updates. Our braindumps will defiantly make you perfect to that level you can easily pass the exam in first attempt. 2016 Juniper JN0-696 exam dumps (All 75 Q&As) from Lead2pass: http://www.lead2pass.com/jn0-696.html [100% Exam Pass Guaranteed]
