Lead2pass 352-001 Exam Questions Free Download: <https://www.lead2pass.com/352-001.html> QUESTION 411 Which two platforms provide hypervisor virtualization? (Choose two.) A. DevStack B. Docker C. KVM D. OpenStack E. Xen Answer: CE QUESTION 412 352-001 Dumps, 352-001 Exam Questions, 352-001 New Questions, 352-001 VCE, 352-001 PDF A company will integrate an IPv6 application into their network and wants to develop a test environment to evaluate application performance across the network. This application consists of both unicast and multicast traffic. The company wants to do this testing only in certain locations of its existing IPv4-only network, and all chosen locations should communicate with each other. Which tunneling technology works in this scenario? A. ISATAP B. 6PE C. DMVPN D. 6to4 Answer: C QUESTION 413 352-001 Dumps, 352-001 Exam Questions, 352-001 New Questions, 352-001 VCE, 352-001 PDF Which option forces traffic to take an explicit route across a backbone network? A. IGP cost B. TE metric C. TE affinity D. multiple IGPs Answer: B QUESTION 414 352-001 Dumps, 352-001 Exam Questions, 352-001 New Questions, 352-001 VCE, 352-001 PDF A mobile network operator is designing an NGN backhaul and plans to migrate their legacy SDH and SONET-based transport network to a packet-based transport network. The NGN network must achieve similar failover and failback times as the legacy network (50 milliseconds). Which method does allow for similar failover and failback times on the new packet-based network? A. BFD B. E-OAM C. UDLD D. BPDU Answer: B QUESTION 415 352-001 Dumps, 352-001 Exam Questions, 352-001 New Questions, 352-001 VCE, 352-001 PDF Which statement describes the main difference between the Layer 2 loop-free inverted U design and the Layer 2 loop-free U design? A. A loop-free U design has all uplinks active, but a loop-free inverted U design does not. B. A loop-free inverted U design has all uplinks active, but a loop-free U design does not. C. A loop-free U design extends VLANs between access switches, but a loop-free inverted U design does not. D. A loop-free U design extends VLANs between distribution switches, but a loop-free inverted U design does not. Answer: C QUESTION 416 352-001 Dumps, 352-001 Exam Questions, 352-001 New Questions, 352-001 VCE, 352-001 PDF An enterprise company needs to transport multicast traffic between its hub-and-spoke WAN routers over an MPLS Layer 3 VPN provider that does not currently support multicast. Which option describes how this enterprise can achieve this requirement in a cost-effective way? A. Use MSDP over the WAN. B. Enable multicast routing on the WAN physical and tunnel interfaces. C. Create multicast-enabled GRE tunnels over the WAN between the hub-and-spoke routers. D. Provide an Internet link to each site and use DMVPN over the Internet. Answer: C QUESTION 417 352-001 Dumps, 352-001 Exam Questions, 352-001 New Questions, 352-001 VCE, 352-001 PDF In a Cisco ACI environment, which option best describes "contracts"? A. a set of interaction rules between endpoint groups B. a Layer 3 forwarding domain C. to determine endpoint group membership status D. named groups of related endpoints Answer: A QUESTION 418 352-001 Dumps, 352-001 Exam Questions, 352-001 New Questions, 352-001 VCE, 352-001 PDF You are developing the routing design for two merging companies that have overlapping IP address space. What must you consider when developing the routing and NAT design? A. Global to local NAT translation is done before routing. B. Local to global NAT translation is done after routing. C. Global to local NAT translation is done after policy-based routing. D. Local to global NAT translation is done before policy-based routing. Answer: D QUESTION 419 352-001 Dumps, 352-001 Exam Questions, 352-001 New Questions, 352-001 VCE, 352-001 PDF Which option should be part of your network design to support dynamic mutual redistribution between multiple OSPFv2 and IS-IS boundaries, to avoid suboptimal routing? A. route tagging and administrative policies B. route filtering and administrative policies C. route aggregation and administrative policies D. disabling IS-IS wide metrics Answer: B QUESTION 420 352-001 Dumps, 352-001 Exam Questions, 352-001 New Questions, 352-001 VCE, 352-001 PDF After a large EIGRP network had automatic summarization enabled throughout, it started experiencing routing loops. Which action should you take to quickly resolve the routing loops yet continue to perform summarization? A. Replace the automatic summarization with more specific summary routes. B. Redesign the IP addressing scheme. C. Redistribute connected routes at major IP network boundaries. D. Increase the AD of the automatically summarized routes. Answer: A
